# RSM Middle Market Business Index

RSM UK has joined forces with Moody's Analytics to produce a first-of-its-kind gauge of middle market business health. An important but under-studied part of the UK economy, the middle market is defined here as companies with annual revenues of £10 million to £750 million. There are close to 33,000 firms in the UK that fall into this category, and together they account for around 10 million jobs and one-third of private company turnover.

The significant role that middle market companies play in the UK economy makes them important to track on a real-time basis. Although geographically diverse and spanning all private industries, the middle market is also predominantly made up of privately held firms for which there are few good sources of timely, public information. A lot of surveys target large and small companies, for example, but very few poll middle market companies and their executives. As a result, their issues and needs are underrepresented in policy and economic discussions.

To bridge the information divide, RSM UK is polling executives of middle market companies to gain insight into how this part of the economy thinks and behaves. The RSM Middle Market Business Index is a comprehensive summary statistic of the state of the middle market that we construct from a subset of survey questions.

---

## Background

Middle market firms are impossible to ignore, given their outsized contribution to the UK economy. Yet, historically, these companies have been hard to evaluate because of a lack of timely data and lack of agreement on what qualifies as a middle market company. To isolate the middle market, companies must be separated into three categories—small, medium and large. However, there is no one metric for comparing company sizes, and limits that define the middle market are not set.

Building on previous work done in the field, we use an upper limit of £750 million turnover and lower limit of £10 million turnover to define the middle market. To better understand the impact of this enormous economic segment, middle market executives are polled and a summary measure created to provide fresh insight into the middle market's immediate prospects and the UK economy as a whole.

## Survey

The survey, which kicked off in the first quarter of 2021, is conducted four times a year, in the first month of each quarter: January, April, July and October. The survey panel consists of approximately 700 middle market executives and is designed to accurately reflect conditions in the middle market.

The data for each quarter are weighted to ensure that they correspond to the analysis of Companies House data on the basis of industry representation. Using the Companies House data as the population of middle market firms, each survey respondent is assigned a weight based on the industry that the respondent belongs to so that results are representative of the middle market population. Each respondent is classified into an industry from the Standard Industrial Classification system (SIC) that is used by the Office for National Statistics.

### Companies are classified into the following SIC private industries:

1. Agriculture, forestry and fishing;
2. Production, including mining, quarrying, manufacturing, electricity, gas, steam and air conditioning supply, water supply, sewerage, waste management, and remediation;
3. Construction;
4. Wholesale and retail trade of motor vehicles and motorcycles, including repair of motor vehicles and motorcycles;
5. Wholesale trade, except of motor vehicles and motorcycles;
6. Retail trade, except of motor vehicles and motorcycles;
7. Transportation and storage;
8. Information and communication;
9. Financial and insurance activities;
10. Real estate activities;
11. Professional, scientific and technical activities;
12. Administrative and support service activities;
13. Education;
14. Human health and social work activities;
15. Arts, entertainment, and recreation; and
16. Accommodation and food service activities.

# Index

The RSM Middle Market Business Index, or MMBI, is created from the subset of questions in the survey that ask respondents to report the change in a variety of indicators. Respondents are asked a total of 20 questions patterned after those in other business surveys.

The 20 questions relate to changes in various measures of their business, such as turnover, profits, capital expenditures, hiring, employee remuneration, prices paid, prices received and stock. There are also questions that pertain to the economy and outlook, as well as to credit availability and borrowing. For ten of the questions, respondents are asked to report the change from the previous quarter; for the other ten they are asked to state the likely direction of these same indicators six months ahead (see below).

## RSM Middle Market Business Index Questions:

1. What are your expectations regarding the general economy?
2. What are your expectations regarding your business's turnover?
3. How would you describe the level of your most recent quarter net profits results?
4. What are your expectations regarding your business's total capital expenditures or investments?
5. What are your expectations regarding your business's overall recruitment?
6. How would you describe the current employee remuneration level on average?
7. How would you describe current access to finance?
8. What are your expectations regarding your business's planned borrowing?
9. How would you describe the current general level of prices received?
10. What are your expectations regarding your business's planned stock levels?

## Index (continued)

The responses to each question are reported as diffusion indexes. Diffusion indexes have the properties of leading indicators and are convenient summary measures showing the prevailing direction of change and the scope of change. Participants are asked whether something has changed, and if so, in which direction. Respondents are allowed five choices in their answers; two positive, two negative, and 'no change'. The two options for positive and negative responses are treated equally in the calculation. Participant responses of 'no change' do not enter into the calculation.

The questions to construct the index are symmetric, such as whether the respondent expects the economy to be better or worse in the next six months and whether there are plans to increase or decrease the number of people working for the firm. Responses are raw data and are never revised. A balance variable or diffusion index is formed for each of the ten questions in the index. The percent of unfavourable responses is subtracted from the percent of the favourable responses to provide a net percent variable.

The MMBI is a composite index computed as an equal weighted sum of the diffusion indexes for ten survey questions plus 100 to keep the MMBI from becoming negative. The index is designed to capture both current and future conditions, with five questions on respondents' recent experience and five on their expectations for future activity.

The MMBI, for period  $t$ , can be derived using the following equation:

$$MMBI_t = \frac{Q1 + Q2 + Q3 + Q4 + Q5 + Q6 + Q7 + Q8 + Q9 + Q10}{10} + 100$$

Over the course of a year, respondents' answers to index questions may undergo regularly occurring fluctuations. To the extent that these fluctuations are seasonal events that follow a regular pattern, their influence on the index can be tempered by adjusting for regular seasonal variation.

Thus, once enough observations exist, each question in the index will be seasonally adjusted when stable seasonality is detected. The seasonal adjustment will be based on the US Census Bureau's X-13 additive procedure and will use a logistic transformation.

For this adjustment the 'increase' and 'decrease' percentage components of each index question will be tested for seasonality separately and adjusted accordingly if such patterns exist. The component will be left unadjusted if no seasonality is detected.

Data are adjusted using a logistic transformation. The 'not seasonally adjusted' series, expressed in decimal form and referred to as NSA, is transformed using the following equation:

$$X = \log\left(\frac{NSA}{1 - NSA}\right)$$

The seasonal factor is then subtracted from X:

$$AdjX = X - \text{Seasonal factor}$$

The result is transformed using the following equation:

$$Sa \text{ series} = \frac{\text{exponential} (adjX)}{1 + \text{exponential} (adjX)}$$

One advantage of diffusion indexes is that they are easy to interpret. A reading above 100 for the MMBI indicates that the middle market is generally expanding; below 100 indicates that it is generally contracting. The distance from 100 is indicative of the strength of the expansion or contraction.

## Information content

One way to determine whether a survey can provide useful information is to look at how well similar surveys have explained or predicted activities in the past. Since the MMBI is constructed using a set of questions that are patterned after those in other widely followed business surveys, there is good reason to believe that the MMBI will prove valuable in explaining and predicting the performance of the middle market economy.

Forecasters and policymakers alike look to surveys, such as those from the Confederation of British Industry (CBI) and the Purchasing Managers' Index (PMI) from IHS/Markit, for predictive insight into the parts of the economy that they aim to represent. Often, these are also useful guides to the direction of the economy as a whole, making them valuable for forecasters and policymakers.

The MMBI will fill a gap in coverage of the middle market and enhance our understanding of the middle market. For example, because middle market firms have played such a critical role in the job creation process in recent years, the MMBI employment measures should have a strong relationship to measures of aggregate employment growth and other labour market indicators.

The collective actions of middle market firms have a major impact on the UK economy. The economic indicators pioneered by CBI and the IHS/Markit indices are shown to have strong empirical relationships to important economic measures, such as growth in GDP, unemployment and inventory investment. Over time, the MMBI will be similarly useful as an indicator of the middle market and economy as a whole.

## About Moody's Analytics

Moody's Analytics provides financial intelligence and analytical tools supporting our clients' growth, efficiency and risk management objectives. The combination of our unparalleled expertise in risk, expansive information resources, and innovative application of technology helps today's business leaders confidently navigate an evolving marketplace. We are recognised for our industry-leading solutions, comprising research, data, software and professional services, assembled to deliver a seamless customer experience. Thousands of organizations worldwide have made us their trusted partner because of our uncompromising commitment to quality, client service, and integrity.

Concise and timely economic research by Moody's Analytics supports firms and policymakers in strategic planning, product and sales forecasting, credit risk and sensitivity management, and investment research. Our economic research publications provide in-depth analysis of the global economy, including the U.S. and all of its state and metropolitan areas, all European countries and their subnational areas, Asia, and the Americas. We track and forecast economic growth and cover specialised topics such as labour markets, housing, consumer spending and credit, output and income, mortgage activity, demographics, central bank behaviour, and prices. We also provide real-time monitoring of macroeconomic indicators and analysis on timely topics such as monetary policy and sovereign risk. Our clients include multinational corporations, governments at all levels, central banks, financial regulators, retailers, mutual funds, financial institutions, utilities, residential and commercial real estate firms, insurance companies, and professional investors.

Moody's Analytics added the economic forecasting firm Economy.com to its portfolio in 2005. This unit is based in West Chester PA, a suburb of Philadelphia, with offices in London, Prague and Sydney. More information is available at [www.economy.com](http://www.economy.com).

Moody's Analytics is a subsidiary of Moody's Corporation (NYSE: MCO). Further information is available at [www.moodyanalytics.com](http://www.moodyanalytics.com).

DISCLAIMER: Moody's Analytics, a unit of Moody's Corporation, provides economic analysis, credit risk data and insight, as well as risk management solutions. Research authored by Moody's Analytics does not reflect the opinions of Moody's Investors Service, the credit rating agency. To avoid confusion, please use the full company name "Moody's Analytics", when citing views from Moody's Analytics.

## About Moody's Corporation

Moody's Analytics is a subsidiary of Moody's Corporation (NYSE: MCO). MCO reported revenue of \$5.4 billion in 2020, employs more than 11,400 people worldwide and maintains a presence in more than 40 countries. Further information about Moody's Analytics is available at [www.moodyanalytics.com](http://www.moodyanalytics.com).

## About Moody's Corporation (continued)

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations – Corporate Governance – Director and Shareholder Affiliation Policy."

## About Moody's Corporation (continued)

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively. MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
